

What's the Crack? When cracking is observed in a building the most common reaction is that it must be the foundations and that it must be serious. Many surveyors are nervous about diagnosing cracks. This is understandable, as the interpretation of cracks can be difficult to teach, with university courses providing little or no time for field experience. Yet by understanding one straightforward principle the majority of cracks can be diagnosed in just a few minutes. Linking this with a good knowledge of construction techniques, the factors that distort cracking patterns and the key features of common causes of cracking, almost all cracks can be diagnosed quickly and with confidence. Practical Guide to Diagnosing Structural Movement in Buildings provides a methodology by which cracks and movement in buildings can be diagnosed. Written in four parts, part one describes the key principles of movement and cracking. Parts two and three describe the main features of common forms of movement and the associated crack patterns. Part two covers causes other than ground or foundation movement and part three covers movement caused by ground or foundation problems. Part four briefly describes the techniques used to arrest further movement or repair damage caused by movement. Primarily intended for the relatively inexperienced surveyor or engineer and undergraduate students of surveying as a practical guide for use on site, it focuses on identification and diagnosis. It will not only help in correctly diagnosing the problem but it will also demonstrate a methodical approach to show and record how the diagnosis was reached – critical when giving advice to third parties. What's the crack? - In the vast majority of cases its not foundation related and in most cases its not indicating a serious defect.

Two Kings of Uganda: Or, Life by the Shores of Victoria Nyanza (Cass Library of African Studies: Missionary Researches and Travels), The life and extraordinary adventures of Private Ivan Chonkin, Rose Reismans Light Vegetarian Cooking, Frederick Mulder, Master Prints (Catalogue 9): To Be Exhibited at Chicago International Art Exposition, Navy Pier, Chicago, 11-15 May 1984, Organic Agriculture for Sustainable Livelihoods (Earthscan Food and Agriculture), Bordeaux Travel Guide: Sightseeing, Hotel, Restaurant & Shopping Highlights by James Crawford (2014-11-14), O Ze do Brasil (Portuguese Edition), I Love My Selfie,

Editorial Reviews. Review. “We would go so far as to say that this is an excellent first read for new surveyors who are developing an understanding of structural.
